

NATURALLY OAK FLOORING

Specialists in the supply and fit of the finest quality solid oak flooring plus the restoration of existing wood flooring.

With an extensive residential and commercial wood flooring portfolio we will provide the **highest quality product** and **service** in the **North East, Yorkshire** and **Humberside** if not the UK.

We supply and expertly fit solid oak flooring, solid strip wood flooring/plank flooring, parquet/block flooring, engineered wood flooring, overlays and mosaic flooring. We have also beautifully restored hundreds of existing wood floors.

**Residential:**

We provide a free, no obligation design and consultation service throughout the North East, Teesside, Yorkshire and Humberside regions. By covering such a large area, wherever you live, we are able to come to you and provide a service that will assess your individual needs and offer you our expert advice from the initial contact through to the supply and fit of the HIGHEST QUALITY hard wood flooring in your home.

**Commercial:**

When undertaking contract wood flooring projects we cover the entire UK. Our projects have ranged from not only the supply and fit of wood flooring in properties such as schools, hotels, restaurants, bars, pubs, clubs, multi residential new developments and churches but also the beautiful restoration of the existing wood floors in all kinds of premises. We strive to work hand in hand with designers and architects alike to achieve quality finishes on a 100% consistent basis.

# WHY CHOOSE OAK FLOORING?

There is a tendency to completely overlook Wooden Flooring, the most obvious reason is the initial outlay of wood over more traditional carpet. However, you reap many great benefits which far outweigh the initial additional cost.

Naturally Oak Flooring will last for decades – The standard life of a carpet is approx 5 years due to general shabbiness and wear and tear. You will find that with a minimal maintenance program, Oak Flooring actually looks better as the years go by.

Oak floors are easier to clean than carpets. A simple brush or light vacuum keeps your Oak floor looking great. Everyday muck from kids or dogs that is dragged through the house is easily brushed away.

Wood flooring is more hygienic than carpets. It is undisputed fact that carpets are home to all sorts of parasites, dust mites and fleas. These allergen producing mites or fleas play havoc with allergy sufferers, a floor from wood eliminates this saving you money and extreme discomfort. This is particularly relevant to dog and cat owner's.

Not only are oak floors more hygienic, but carpets also trap in unpleasant odours from animals or things that have been spilt. The aroma of a polished wooden floor is a delight and will make your home more inviting.

Oak flooring provides a great medium to install under floor heating, which these days is considered by far the most efficient way to heat your house.

If after a few years, if your oak floor has been scratched or is a bit damaged due to heavy wear and tear. A simple sand and seal will bring it back to new again. This is a lot less costly than refitting a new carpet.

Stone and tile floors although as hygienic and easy to maintain as wood, don't have the same warmth and feel that timber floors have.

Quality is  
not expensive,  
it's priceless.
